Date: February 21, 2018

Grant Title: Learning with Today's Technologies

School: Ethel M. Reed Elementary

Amy Cofer

Grade Level(s): Pre-K

Content Area: Reading/Language and Math are the primary emphasis of the grant. Creative Skills, Science, and Social Studies objectives will also be met.

Total Dollar Amount Requested: \$599.00

1. What is the major educational need this grant addresses? Please give grade level and academic area.

Following the Oklahoma State Department of Education Pre-Kindergarten guidelines (PASS), our classrooms provide a math and literacy-rich curriculum. In my classroom I strive to provide a wide range of developmental interests and abilities. These learning interactive software games will provide that on many levels. The materials and methods included in this grant will also meet the Oklahoma Pre-K guidelines in the following areas: Creative Skills, Language Arts, Science, and Social Studies.

2. Approximately how many pupils will be affected by this project, both directly and indirectly?

There will be approximately sixty students directly affected by this project throughout the 2018-2019 school year. The materials are non-consumable, meaning this on-going project will affect an infinite number of students throughout the subsequent years. The materials in

this grant are developmentally appropriate for children 4 and 5 years of age, allowing all Pre-K children to participate, and experience success.

3. Describe your grant including methods, materials and objectives. Foundation grants are intended to fund a creative teaching plan, so if equipment or materials are requested it should be clearly stated as to why these are an integral part of the plan.

The materials requested in this grant will be used on a daily basis as part of morning and afternoon meetings. The students will also utilize the smart board during center time, using different games to practice diverse skills. The materials in this grant are a part of a greater plan... building a foundation for success to enable students to excel in the future.

As we all know, the expectations for our students in all subjects are higher than ever. This challenges all educators to teach a broader variety of curriculum. As a teacher, I am always looking for new ways to teach, as well as different ways to reinforce skills that have already been taught. Using technology is an exciting way to reach students.

The Reading materials in this grant will provide practice with one of the most important skills a child can learn ... reading. To prepare students to read, our focus in Pre-K is letter recognition, and letter/sound correspondence.

The Math materials in this grant will provide the students with extra practice in patterning, number recognition, counting, creating and recognizing the value of sets, measuring, sorting, shapes and colors.

This grant will also provide materials that will enhance the students' Science skills. Our new curriculums, as well as our standard assessments, require science as a part of everyday learning. All of the materials will foster teamwork and confidence.

OBJECTIVES:

The learner will:

- A. Follow simple oral directions. (1.R.4)*
- B. Work respectfully with others. (1.W.2)*
- C. Recognize spoken words that rhyme. (2.PA.2)*
- D. Begin to recognize syllables in spoken words. (2.PA.3)*
- E. Begin to isolate initial and final sounds in spoken words. (2.PA.4)*
- F. Begin to recognize initial sounds in a set of spoken words. (2.PA.5)*
- G. Recognize that written words are made up of letters and are separated by spaces. (2.PC.4)*
- H. Produce some sounds represented by letters. (2.PWS.2)*
- I. Acquire new academic, content-specific, grade-level vocabulary and relate new words to prior knowledge. (4.R.1)*
- J. Name and sort familiar objects into categories based on common attributes. (4.R.3)*
- K. Begin to use new vocabulary to produce and expand complete sentences. (4.W.1)*
- L. Begin to select appropriate language according to purpose. (4.W.2)*

- M. Group pictures and movements, and determine spatial and time relation such as up, down, before, and after. (5.R.4)
- N. Count aloud forward in sequence by 1's to 20. (N.1.1)
- O. Recognize and name written numerals 0-20. (N.1.2)
- P. Identify the number of objects, up to 10, in a row or column. (N.2.1)
- Q. Use one-to-one correspondence in count objects and match groups of objects. (N.2.2)
- R. Understand the last numeral spoken, when counting aloud, tells how many objects are in the set. (N.2.3)
- S. Count up to 5 items in a scattered configuration; not in a row or column. (N.2.4)
- T. Compare two sets of 1-5 objects using comparative language such as, more, or fewer. (N.3.1)
- U. Sort and group up to 5 objects into a set based upon characteristics such as color, size, and shape and explain verbally what the objects have in common. (A.1.1)
- V. Recognize, duplicate, and extend repeating patterns involving manipulates, sounds, movements, and other context. (A.1.2)
- W. Identify circle, square, rectangle, and triangle by pointing to the shape when given the name. (GM.1.1)
- X. Identify measurable attributes of objects. Describe them as little, big, long, short, tall, heavy, light, or other age appropriate vocabulary. (GM.2.1)
- Y. Directly compare two objects with a common measurable attribute using words such as longer/shorter; heavier/lighter; or taller/shorter. (GM.2.2)
- Z. Sort objects into sets by one or more attributes. (GM.2.3)

4. Give a time schedule of implementation.

The materials provided by this grant will be implemented in the Pre-K classroom on a daily basis, beginning the first week of school, or as soon as it arrives.

5. Detail your budget request. Include specific information about kinds of materials and equipment needed, sources of supply, and costs (including shipping and handling). If possible, list alternatives if full funding is not available.

|--------------------|-----------------|
| Total Grant | \$599.99 |
|--------------------|-----------------|

6. What methods will be used for measuring the stated objectives, or what definite evaluation will you make to determine whether the grant was successful? (Please be specific)

The age level of the students dictates that teacher observation, and class discussions are used to evaluate understanding and comprehension. Formal assessments are not developmentally appropriate for Pre-K level students. This grant will be considered a success when Pre-K students have the knowledge of Reading, Math, and Science skills they would otherwise not be exposed to.

Introducing students to technology as early as possible gives them an advantage as they move on to higher grades.
