Submit in the format listed below.*

Date: March 28, 2019

Grant Title: Let's All Learn Together

School: Thomas Middle School

Grade Level(s): 5th

Content Area: All Subject areas

Total Dollar Amount Requested: ~~\$2143.00~~ 945<sup>00</sup>

Sharlene McDaniel  
Nancy Giles  
Sherry Ellingsworth

1. What is the major educational need this grant addresses? Please give grade level and academic area.

The SMART Document Camera 550 will help with the use of resource materials to aid in reading, language arts, writing, social studies and science. Classes will be able to expose students to large number of nonfiction writings to enable proficiency in narrative, opinion and informative essay writing. The SMART will also aid in social studies with the availability to show many documents from the Bill of Rights and Constitution on the smart board along with biographical novels. Science will be able to access experiments and directions that are available in other resource books. Reading will be able to have read alongs with more books and each student will be able to follow along with the stories and increase comprehension and vocabulary.

Some teaching resources cannot be found on the internet to be used with our smartboards and the Smart Document Camera 550 will capture 3D objects and images so large groups of students will be able to view resources together and learn at a faster pace. We would like to help increase students' vocabularies and reading levels using the Smart Document Camera 550.

2. Approximately how many pupils will be affected by this project, both directly and indirectly? Students affected by this grant will be all of the fifth grade students. They will be students who attend social studies/science, reading/vocabulary and language/spelling/writing classes will be affected by this project.

- Describe your grant including methods, materials and objectives. Foundation grants are intended to fund a creative teaching plan, so if equipment or materials are requested it should be clearly stated as to why these are an integral part of the plan.

Teachers will be able to use the SMART Document Camera 550 to bring items into the classroom that before had to be copied in black and white or put on transparencies. The Constitution of the United States or the Bill of Rights or pictures of the Civil War; reading passages or nonfiction books; poetry, prose and other writings can be displayed for the students to experience in their classrooms.

This technology will keep learning fresh for our students, especially since they live in a technological age. We would like to make learning as fresh and exciting as possible for each and every student.

Objectives are for the student to achieve a successful goal of learning for their level. We hope to bring below level readers and level readers to above level abilities. Providing an innovative way of teaching is essential in this day and age.

- Give a time schedule of implementation.

We, the teachers of fifth grade reading/vocabulary, social studies/science and language/writing/spelling would be able to implement the Smart Document Camera 550 as soon as we receive and set it up. We are excited to expand our teaching to innovative technology in our classrooms.

- Detail your budget request. Include specific information about kinds of materials and equipment needed, sources of supply, and costs (including shipping and handling). If possible, list alternatives if full funding is not available.

Available from Video Reality, P.O. Box 721730 Oklahoma City, OK 73172

Requested Budget:

SMART Document Camera 550

Cost of 3

Shipping/Handling

TOTAL

315<sup>00</sup>  
~~\$669.00~~ each  
 2097.00 945<sup>00</sup>  
 46.00  
 \$2143.00 945<sup>00</sup>

- What methods will be used for measuring the stated objectives, or what definite evaluation will you make to determine whether the grant was successful? (Please be specific)

Student discussion, written expression and written exams will be used to determine how well the students are responding to the SMART Document Camera 550. We need to use this technology for our students to be able to travel the universe and see what is out there to be explored.
