## Grants to Teachers Application Form

*Please use a typewriter or word processor to complete the application.  
Submit in the format listed below.*

Date: March 22, 2021

Grant Title: Smart Kids Need Smart Boards

School: Ethel Reed Elementary

Grade Level(s): 3rd

Content Area: Reading, Language Arts, Math, Spelling

Total Dollar Amount Requested: \$3,007.00

**1. What is the major educational need this grant addresses? Please give grade level and academic area.**

The major educational need this grant addresses is a Smart Board for my classroom. I am currently using an outdated Smart Board and am unable to use it to its full capacity. With the advances of technology, our school has put more focus into supplying students with Chrome Books and iPads, which are crucial to student learning, but because of this, Smart Boards are becoming outdated.

A Smart Board is a valuable tool for teachers and students in all subject areas. Not only can it be an engaging device, but it can also be a great reward for students. The amount of resources that are available through a Smart Board are unlimited. With a SMART board, you can project a video, picture, website, game or educational guide on the screen to complement your daily lesson. It is an interactive outlet that allows students to explore technology through learning activities.

Third grade students are required to take the OSTP assessments. A Smart Board is a necessary learning tool that enhances learning and better equips students with skills required to pass state mandated tests. It would make test preparation and lessons more engaging and interactive.

**2. Approximately how many pupils will be affected by this project, both directly and indirectly?**

The total number of students that will be affected by a Smart Board is unlimited. Not only will the Smart Board be used with my students, it will also be used for intervention time, after school tutoring, and our summer reading program.

**3. Describe your grant including methods, materials and objectives. Foundation grants are intended to fund a creative teaching plan, so if equipment or materials are requested it should be clearly stated as to why these are an integral part of the plan.**

Smart Boards involve a multi-sensory approach that enhances the processing of information and learning opportunities of all students. This technology is especially useful for students that are visual and tactile learners. Students learn better if the material is presented in different learning styles. Smart Boards help learning come to life through hands on technology and the ability to actively participate in their learning.

A Smart Board is a tool that can be used in all subject areas throughout each day. It has become an integral part of everyday learning for students of all learning abilities, and is a staple in a modern day classroom.

**4. Give a time schedule of implementation.**

The Smart Board could be used immediately. Starting the 2021-2022 school year with a Smart Board would be ideal.

- 5. Detail your budget request. Include specific information about kinds of materials and equipment needed, sources of supply, and costs (including shipping and handling). If possible, list alternatives if full funding is not available.**

Total cost of the Smart Board including installation and shipping is \$3,007.00.  
A quote has been attached.

- 6. What methods will be used for measuring the stated objectives, or what definite evaluation will you make to determine whether the grant was successful? (Please be specific)**

Students will be assessed formally and informally after the completion of lessons taught from the Smart Board.

## Scope of Work

**\*\* Attention: Based on COVID-19 and the resulting manufacturing shipping delays, please anticipate longer than normal turnaround times from the date a PO is issued before an installation can be scheduled.**

This is a scope of work for one (1) SMART MX series 65" interactive displays with a 5-year bundle. The bundle includes the following:

- 65" interactive display. A flat wall mount is included.
- A 5-years of SMART Learning Suite subscription.
- 5-years of hardware warranty.

Installation is also included. The displays must be installed on a flat wall. 15-foot HDMI and USB cables will be used to connect the teachers laptops to the convenience panel on the front of the board.

### Customer Responsibilities:

The customer is responsible for providing an outlet to each display. It is also recommended that a network drop is used to connect the displays to the customer's network. If that is not available, the customer's WiFi can be used.
